1. Soviet engines for YAK-3 fighter planes which were obtained from the Soviet Union before the break with the Cominform, are currently being installed on Yugoslav manufactured S-49 planes. The total number of these imported aircraft engines was 160. They were transferred from the airforce depots in Novi Sad, where they were stored between 1948 and 1949, to Kolare, where they are now located.
2. Spare parts for these engines are manufactured in Yugoslav factories, although complete engines for YAK-3 planes have not been produced by Yugoslavia to date.
